

Corrugated Corners

S2750 Corrugated Corners Adjustable
(1 box of 200)

ADJUST-I adjustable-depth corners fold to lock over mouldings and cover 4 inches x 4 inches (10.16cm) of the frame corner length with three adjustable depth (or height) dimensions of 1/2 inch (1.27cm), 1 inch (2.54) or 1 1/2 inches (3.81cm).

Corrugated corners have tightly locking tabs to ensure a fit that will not result in corners popping off of frame-no tape or staples required. These white-faced corners are made from sturdy corrugated stock and are stripped of waste to keep work areas clean and efficient.
